Introduction

Healthy or sick, young or old, the one thing all your patients have in common is the need for a highly nutritious diet. Purina has formulated a wide range of nutritional options ranging from therapeutic diets for pets with complex health issues to well-pet formulas to meet the nutritional needs of dogs and cats in each life stage.

Purina has several supplements developed by experts that meet our strict quality and safety standards. This includes probiotic supplements that represent Purina's leadership in the field of microbiome research.

This guide contains technical information on each product from Purina® Pro Plan® Veterinary Diets and Supplements and helps identify the appropriate diet or supplement for each patient. The well-pet brands in this guide represent the high-quality choices available to your clients.

For more information about Purina Pro Plan Veterinary Diets and Supplements or any of the Purina Pro Plan well-pet diets, contact your Purina Veterinary Sales Consultant, your Veterinary Distributor, or call 1-800-222-VETS (8387), Monday - Thursday 8:00 am - 6:00 pm CST; Friday 8:00 am - 4:30 pm CST.

Canine Diets

THE FOLLOWING SUGGESTED DIETS MAY BE APPROPRIATE FOR DOGS WITH CERTAIN FORMS OF THESE HEALTH CONDITIONS.

CONDITION	SUGGESTED DIETS/SUPPLEMENTS
Atopic Dermatitis	DRM Dermatologic Management [®] Naturals With Added Vitamins and Minerals
Cognitive Dysfunction Syndrome	NC NeuroCare [®]
Constipation	EN Gastroenteric [®] Fiber Balance

CARDIOCARE®

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Mitral valve disease and other cardiomyopathies
- Cardiovascular disease
- Conditions benefitting from moderate sodium restriction

Medical Contraindications:

- None

General Health:

- High protein content to help maintain ideal body condition and lean body mass
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake

Actual Size

Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Purina Pro Plan Veterinary Diets CC CardioCare Canine Formulas provide complete and balanced nutrition for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE ¹

		3672 kcal/kg	1016 kcal/kg
		1666 kcal/lb	461 kcal/lb
		429 kcal/8-oz cup	385 kcal/13.4-oz can

Cardiac Health:

First therapeutic diet to target metabolomic changes in dogs with myxomatous mitral valve disease

Breakthrough multiomics approach to the development of a cardiac protection blend to help nutritionally manage dogs with myxomatous mitral valve disease

Contains a Cardiac Protection Blend composed of amino acids and fatty acids (omega-3 and medium-chain triglycerides), magnesium and vitamin E; this blend has been shown to:

- a) Increase serum omega-3 and decrease omega-6 fatty acid concentrations to help nutritionally manage dogs with cardiac conditions
- b) Increase serum arginine and citrulline, precursors of nitric oxide, to promote vasodilation
- c) Improve energy use as signified by biomarkers of fatty acid oxidation

- Helps stabilize cardiac parameters as measured by echocardiography in dogs with early stage mitral valve disease
- Supports cardiac function in dogs with early stage mitral valve disease

Ingredients (Dry):

Oat meal, corn protein meal, rice, chicken meal, animal fat preserved with mixed-tocopherols, vegetable oil (source of medium-chain triglycerides), cassava root flour, dried beet pulp, potato protein, powdered cellulose, liver flavor, fish meal, fish oil, mono and dicalcium phosphate, natural flavor, calcium carbonate, L-Lysine monohydrochloride, DL-Methionine, potassium chloride, magnesium sulfate, potassium sorbate (a preservative), L-Arginine, salt, Vitamin E supplement, taurine, L-Cysteine, glycine, choline chloride, zinc sulfate, ferrous sulfate, L-ascorbyl-2-polyphosphate (Vitamin C), niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, soybean oil, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. B264023

Ingredients (Canned):

Water, meat by-products, chicken, rice, powdered cellulose, dextrose, vegetable oil (source of medium-chain triglycerides), fish oil, dried egg product, L-Lysine monohydrochloride, glycine, DL-Methionine, carrageenan, magnesium sulfate, locust bean gum, potassium chloride, garlic powder, tricalcium phosphate, taurine, Vitamin E supplement, xanthan gum, zinc sulfate, L-Carnitine, ferrous sulfate, niacin (Vitamin B-3), thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), copper sulfate, manganese sulfate, pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), potassium iodide, sodium selenite. Carbohydrate, %	32.5	21.5

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

CN**CRITICAL
NUTRITION®**

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Critical Illness
- Conditions that require assisted feeding
- Convalescence
- Anorexia
- Malnutrition

Medical Contraindications:

- Renal failure

CN Critical Nutrition can be diluted and will pass through most feeding tubes 14 French or larger. 1 can CN + 25 mL water recommended for most tube feeding results in 1.14 kcal/mL.

Feeding and Administration:

Pro Plan Veterinary Diets CN Critical Nutrition Canine & Feline Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments based on the patient's condition and nutritional status. CN Critical Nutrition may be fed free-choice or by syringe or tube feeding.

			1325 kcal/kg		
			601 kcal/lb		
			206 kcal/5.5-oz can		
			1.35 kcal/mL ⁵		

Critical Care:

Highly digestible to promote optimal nutrient absorption

Energy-dense to provide needed calories

Provides essential amino acids for protein synthesis and tissue repair

High fat to provide energy density

- Smooth consistency to allow for syringe or tube feeding
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

Ingredients:

Water, meat by-products, beef, liver, poultry giblets, corn oil, rice flour, salmon, artificial and natural flavors, pork fat (preserved with TBHQ and citric acid), tricalcium phosphate, potassium chloride, guar gum, oat hulls, calcium sulfate, magnesium sulfate, DL-Methionine, taurine, Vitamin E supplement, choline chloride, zinc sulfate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, manganese sulfate, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, sodium selenite. Dental Health:

Optimal kibble size and unique, crunchy kibble texture provide mechanical action to reduce the accumulation of tartar

www.VOHC.org

- VOHC Seal of Acceptance: helps control tartar

General Health:

- Appropriate protein content to help maintain ideal body condition
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Available in Small Bites for dogs weighing less than 30 pounds
- Great taste to help ensure adequate nutrient intake
- Promotes a urinary environment unfavorable to the development of both sterile struvite* and calcium oxalate crystals (DH only)

Ingredients (DH):

Chicken, chicken meal, rice, ground yellow corn, ground wheat, corn protein meal, animal fat preserved with mixed-tocopherols, dried beet pulp, dried yeast, powdered cellulose, liver flavor, dried egg product, glycerin, salt, potassium chloride, calcium carbonate, phosphoric acid, mono and dicalcium phosphate, Vitamin E supplement, choline chloride, L-Lysine monohydrochloride, L-ascorbyl-2-polyphosphate (Vitamin C), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, potassium sorbate (a preservative), Vitamin A supplement, soybean oil, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. †Based on digestion testing conducted at the Purina PetCare Technology Centers

*Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

WITH ADDED VITAMINS, MINERALS & NUTRIENTS

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Atopic dermatitis
- Pruritus
- Flea allergy dermatitis
- Other inflammatory skin conditions
- Conditions benefitting from moderate sodium restriction

Medical Contraindications:

- None

Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets DRM Dermatologic Management Naturals Canine Formula provides complete and balanced nutrition for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

Skin Health:

Formulated for the nutritional management of dogs with dermatitis

Contains omega-3 fatty acids to help nutritionally manage dogs with inflammation associated with pruritus

Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier

Natural Nutrition:

Natural with added vitamins, minerals and nutrients. Formulated without corn, wheat, or artificial colors and flavors

General Health:

- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake
- Promotes a urinary environment unfavorable to the development of both sterile struvite* and calcium oxalate crystals

Ingredients:

Brewers rice, trout, oat meal, pea protein, beef fat preserved with mixed-tocopherols, natural flavor, potato protein, pea fiber, fish oil, mono and dicalcium phosphate, glycerin, calcium carbonate, potassium chloride, salt, L-Lysine monohydrochloride, taurine, Vitamin E supplement, choline chloride, zinc sulfate, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, zinc sulfate, manganese sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium carbonate, beta-Carotene, calcium pantothenate (Vitamin B-5), copper sulfate, thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), calcium iodate, menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. EL**ELEMENTAL**

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

ELIMINATION DIET TRIAL

- Adverse food reaction
 - Food allergic dermatitis
 - Food allergic gastroenteritis
 - Food intolerance
- Inflammatory bowel disease
- Idiopathic chronic enteropathy
- Protein-losing enteropathy
- Short bowel syndrome

Medical Contraindications:

- None

Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets EL Elemental Canine Formula provides complete and balanced nutrition for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

Gastrointestinal Health and Food Sensitivities:

Formulated with purified amino acids to support dermatological and gastrointestinal health in dogs with adverse food reactions

Low-allergen carbohydrate sources to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

- Limited fat to aid digestion for dogs with compromised gastrointestinal tracts
- Contains medium-chain triglycerides (10.70 - 17.27% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Post-manufacturing testing conducted to ensure trace levels of intact proteins do not exceed 0.1%

General Health:

- Contains omega-3 fatty acids, a source of EPA and DHA, omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Contains prebiotic fiber to help nourish the GI tract
- Great taste to help ensure adequate nutrient intake

Ingredients:

Corn starch, tapioca starch, dicalcium phosphate, glycine, partially hydrogenated canola oil preserved with TBHQ, L-Glutamic acid, coconut oil, L-Alanine, L-Aspartic acid, L-Lysine monohydrochloride, powdered cellulose, L-Leucine, L-Arginine, L-Valine, sodium bicarbonate, L-Threonine, L-Proline, L-Serine, DL-Methionine, potassium chloride, L-Isoleucine, corn oil, L-Histidine, L-Phenylalanine, salt, L-Tyrosine, soy lecithin, fish oil, inulin, choline bitartrate, L-Tryptophan, taurine, zinc sulfate, magnesium oxide, Vitamin E supplement, ferrous sulfate, manganese sulfate, niacin (Vitamin B-3), soybean oil, Vitamin A supplement, copper sulfate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, calcium iodate, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets EN Gastroenteric Naturals Dry Canine Formula provides complete and balanced nutrition for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult). Pro Plan Veterinary Diets EN Gastroenteric Naturals Canned Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE ¹

		3549 kcal/kg	1130 kcal/kg
		1610 kcal/lb	495 kcal/lb
		364 kcal/8-oz cup	429 kcal/13.4-oz can

Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Contains medium-chain triglycerides (7.5 – 12.1% of fat), a source of fat which is easily digested and absorbed to provide readily available energy

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Contains a select prebiotic fiber to support GI microbiome balance and digestive health (dry)

Natural Nutrition:

Natural with added vitamins, minerals and nutrients. Formulated without corn, wheat, or artificial colors and flavors

General Health:

- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Brewers rice, chicken meal, brewers dried yeast, cassava root flour; animal fat preserved with mixed-tocopherols, potato protein, natural flavor, coconut oil, pea protein, glycerin, mono and dicalcium phosphate, potassium chloride, soybean oil, salt, L-Lysine monohydrochloride, dried colostrum, fish oil, calcium carbonate, pumpkin, Vitamin E supplement, zinc proteinate, taurine, choline chloride, DL-Methionine, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, manganese proteinate, niacin (Vitamin B-3), Vitamin A supplement, thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), menadione sodium bisulfite complex (Vitamin K), folic acid (Vitamin B-9), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. E262523

Ingredients (Canned):

Chicken, water, liver, barley, rice, sweet potatoes, potato protein, coconut oil, oatmeal, glycerin, tricalcium phosphate, guar gum, potassium chloride, salt, natural smoke flavor, fish oil, Vitamin E supplement, L-Lysine monohydrochloride, magnesium sulfate, zinc sulfate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, manganese sulfate, calcium pantothenate (Vitamin B-5), pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. 1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

EN GASTROENTERIC®

FIBER BALANCE

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Fiber responsive colitis
- Large bowel diarrhea
- Constipation
- Diabetes mellitus

Medical Contraindications:

- None

Feeding and Administration:

Pro Plan Veterinary Diets EN Gastroenteric Fiber Balance Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

- Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Promotes a healthy skin and coat

General Health:

- Contains antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Corn starch, hydrolyzed soy protein isolate, partially hydrogenated canola oil preserved with TBHQ, coconut oil, powdered cellulose, tricalcium phosphate, corn oil, dicalcium phosphate, hydrolyzed chicken liver, hydrolyzed chicken giblets, potassium chloride, guar gum, choline chloride, calcium carbonate, salt, magnesium oxide, DL-Methionine, taurine, zinc sulfate, Vitamin E supplement, ferrous sulfate, manganese sulfate, soybean oil, niacin (Vitamin B-3), copper sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, garlic oil, pyridoxine hydrochloride (Vitamin B-6), calcium iodate, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. C262721

Ingredients (Canned):

Water, pea starch, hydrolyzed chicken liver, hydrolyzed soy protein isolate, powdered cellulose, dicalcium phosphate, coconut oil, guar gum, potassium chloride, carrageenan, soybean oil, fish oil, choline chloride, magnesium sulfate, salt, taurine, L-Threonine, DL-Methionine, xanthan gum, Vitamin E supplement, L-Cysteine, zinc sulfate, glycine, ferrous sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium carbonate, copper sulfate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), manganese sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), potassium iodide, menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. †Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

HA

HYDROLYZED®

SALMON FLAVOR

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

GASTROINTESTINAL

- Elimination diet trial
- Food allergic gastroenteritis
- Food intolerance
- Chronic Enteropathy/
Inflammatory Bowel Disease
- Lymphangiectasia
- Protein-losing enteropathy
- Pancreatitis
- Exocrine pancreatic
insufficiency
- Malabsorption

DERMATOLOGIC

- Elimination diet trial
- Food allergic dermatitis

ADDITIONAL

- Hyperlipidemia

Medical Contraindications:

- None

Feeding and Administration:

Pro Plan Veterinary Diets HA Hydrolyzed Salmon Flavor Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE¹

BODY WEIGHT		DRY

Gastrointestinal Health and Food Sensitivities:

Formula contains hydrolyzed protein sources to reduce the risk of allergic reaction

Single low-allergen carbohydrate source (corn starch) to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

- Contains medium-chain triglycerides (14.5-23.4% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Promotes a healthy skin and coat

General Health:

- Contains antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients:

Corn starch, hydrolyzed soy protein isolate, coconut oil, tricalcium phosphate, partially hydrogenated canola oil preserved with TBHQ, hydrolyzed salmon, powdered cellulose, corn oil, potassium chloride, L-Threonine, guar gum, DL-Methionine, fish oil, choline chloride, calcium carbonate, magnesium oxide, Vitamin E supplement, taurine, zinc sulfate, dicalcium phosphate, salt, ferrous sulfate, manganese sulfate, niacin (Vitamin B-3), soybean oil, Vitamin A supplement, copper sulfate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), calcium iodate, menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. JM**JOINT MOBILITY®**

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Adult and senior dogs with osteoarthritis
- Healthy puppies and adult dogs predisposed to joint disorders
- Rheumatoid arthritis
- Other inflammatory joint conditions
- Heart disease

Medical Contraindications:

- None

Feeding and Administration:

Pro Plan Veterinary Diets JM Joint Mobility Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

Joint Mobility:

High level of omega-3 fatty acids (EPA) to help nutritionally manage dogs with joint conditions

Improves mobility in arthritic dogs

Contains glucosamine to help support cartilage health

- Reduces enzymes involved in cartilage breakdown
- Reduces inflammation associated with joint conditions

General Health:

- High protein-to-calorie ratio to help support lean muscle mass
- May be fed for weight loss and weight maintenance
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Formulated with a moderate sodium restriction, high protein and high omega-3 fatty acid level for the nutritional support of dogs with heart disease
- Great taste to help ensure adequate nutrient intake

Ingredients:

Brewers rice, trout, salmon meal, corn protein meal, poultry by-product meal, dried egg product, oat fiber, natural flavor, animal fat preserved with mixed-tocopherols, fish oil, chicken, mono and dicalcium phosphate, potassium chloride, Vitamin E supplement, calcium carbonate, salt, choline chloride, glucosamine hydrochloride, zinc sulfate, taurine, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, manganese sulfate, copper sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride, calcium iodate, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. 		1693 kcal/lb
		396 kcal/8-oz cup

Neurologic Health:

Formulated with medium-chain triglyceride vegetable oil to help nutritionally manage dogs with epilepsy as an adjunct to veterinary therapy

Cognitive Health:

Enhanced with a unique blend of nutrients and medium-chain triglyceride vegetable oil to help nutritionally manage dogs with Cognitive Dysfunction Syndrome

General Health:

- Added antioxidant vitamins E & C to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Omega-3 fatty acids to help support brain health and EPA to help reduce inflammation
- High in protein to help maintain lean muscle mass
- Great taste to help ensure adequate nutrient intake
- Promotes a urinary environment unfavorable to the development of both sterile struvite* and calcium oxalate crystals

Ingredients:

Chicken, chicken meal, corn protein meal, brewers rice, ground yellow corn, ground wheat, vegetable oil (source of medium-chain triglycerides), corn germ meal, barley, glycerin, fish oil, natural flavor, dried egg product, L-Arginine, wheat bran, mono and dicalcium phosphate, fish meal, salt, potassium chloride, calcium carbonate, L-Lysine monohydrochloride, Vitamin E supplement, choline chloride, L-ascorbyl-2-polyphosphate (Vitamin C), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, thiamine mononitrate (Vitamin B-1), soybean oil, calcium pantothenate (Vitamin B-5), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. *Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

¹ Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

² Kilocalories of metabolizable energy (ME)

³ This daily amount should be divided into several small meals throughout the day.

⁴ For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

NF**KIDNEY FUNCTION®**

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Chronic kidney disease
- Hepatic disease associated with encephalopathy
- Conditions benefitting from moderate sodium reduction

Medical Contraindications:

- Conditions that require high protein or phosphorus intake

Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets NF Kidney Function Canine Formulas provide complete and balanced nutrition for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE¹

BODY WEIGHT		DRY	CANNED

		1739 kcal/lb	582 kcal/lb
		428 kcal/8-oz cup	483 kcal/13.3 oz can

Renal Health:

Restricted amount of high-quality protein to minimize the production of filtered nitrogenous waste products

Restricted phosphorus to nutritionally manage dogs with chronic kidney disease

Reduced sodium to minimize the risk of hypertension

- Added B-complex vitamins to help compensate for those lost secondary to polyuria
- Formulated to be non-acidifying
- Energy-dense for needed calories

General Health:

- Contains antioxidant vitamins A and E to help support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Whole grain corn, rice, dried egg product, animal fat preserved with mixed-tocopherols, sugar, glycerin, liver flavor, dried whey, sodium caseinate, natural flavor, calcium carbonate, vegetable oil, potassium chloride, fish oil, L-Lysine monohydrochloride, salt, potassium citrate, mono and dicalcium phosphate, Vitamin E supplement, choline chloride, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. D262923

Ingredients (Canned):

Water sufficient for processing, meat by-products, rice, corn grits, beef, liver, chicken by-products, animal fat (preserved with TBHQ and citric acid), calcium sulfate, guar gum, fish oil, potassium citrate, locust bean gum, carrageenan, potassium chloride, magnesium sulfate, choline chloride, natural smoke flavor, Vitamin E supplement, DL-Methionine, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), copper sulfate, pyridoxine hydrochloride (Vitamin B-6), manganese sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), potassium iodide, sodium selenite. †Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

OM OVERWEIGHT MANAGEMENT®

Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Obesity (weight loss and weight maintenance)
- Constipation
- Fiber responsive colitis
- Diabetes mellitus in overweight dogs
- Hyperlipidemia in overweight dogs

Medical Contraindications:

- Conditions associated with catabolic states

Feeding and Administration:

Pro Plan Veterinary Diets OM Overweight Management Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs. Pro Plan Veterinary Diets OM Overweight Management Canine Formula With Chicken In Sauce is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight loss or maintenance.

Healthy Weight Loss:

Low in fat and calories

High protein-to-calorie ratio promotes loss of body fat while helping maintain lean body mass

Natural fiber contributes to satiety

- Added L-carnitine to help dogs burn fat more effectively
- Isoflavones help reduce the risk of weight regain and fat accumulation (dry only)
- Available in dry, including Select Blend, and wet to help with long-term compliance and weight-loss success
- May be fed for weight loss or weight maintenance

General Health:

- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake
- Promotes a urinary environment unfavorable to the development of both sterile struvite* and calcium oxalate crystals

Ingredients (Dry):

Whole grain corn, corn protein meal, soybean hulls, soybean germ meal, soybean meal, pea fiber, wheat gluten, poultry by-product meal, glycerin, natural flavor, powdered cellulose, animal fat preserved with mixed-tocopherols, tricalcium phosphate, salt, calcium carbonate, choline chloride, Vitamin E supplement, zinc sulfate, ferrous sulfate, L-Lysine monohydrochloride, L-Carnitine, manganese sulfate, niacin (Vitamin B-3), Vitamin A supplement, soybean oil, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), copper sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. F263023

Ingredients (Canned):

Water, chicken, liver, powdered cellulose, rice, soy protein isolate, meat by-products, carrageenan, guar gum, tricalcium phosphate, potassium chloride, calcium sulfate, locust bean gum, magnesium sulfate, Vitamin E supplement, calcium carbonate, zinc sulfate, L-Carnitine, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, calcium pantothenate (Vitamin B-5), manganese sulfate, pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. Healthy Weight Loss:

3:1 protein-to-starch ratio

Shown to reduce body fat and minimize loss of lean body mass in a 6-month weight loss study*

- Natural fiber contributes to satiety
- Isoflavones help reduce risk of weight regain and fat accumulation
- Added L-carnitine to help dogs burn fat more effectively

Metabolic Activity:

Helps improve select metabolic health indicators

- Shown to reduce postprandial interstitial glucose
- Shown to reduce serum cholesterol**
- Shown to reduce and stabilize serum triglyceride concentration**
- Shown to significantly decrease fasting serum leptin**
- Shown to significantly decrease fasting insulin levels after 6 months of weight loss*
- Shown to reduce select pro-inflammatory cytokines after 6 months of weight loss*

Ingredients (Dry):

Wheat gluten, soy protein concentrate, poultry by-product meal, soybean germ meal, fish meal, pea protein, corn starch, dried beet pulp, powdered cellulose, natural flavor, fish oil, animal fat preserved with mixed-tocopherols, sodium caseinate, dried egg product, gelatin, potassium chloride, soy protein isolate, calcium carbonate, inulin, tricalcium phosphate, salt, Vitamin E supplement, taurine, choline chloride, L-Carnitine, glucosamine hydrochloride, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), copper sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. B264123

Joint Mobility:

High level of omega-3 fatty acids (EPA) to help nutritionally manage dogs with joint conditions

- Contains glucosamine to help support cartilage health

General Health:

- Vitamin A & E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake

* Caloric restriction @25% MER for months 1-4 and @40% MER for months 5-6; on package feeding instructions reflect 40% restriction.
** After 2 months of weight loss

* Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

CRITICAL NUTRITION®

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Critical Illness
- Conditions that require assisted feeding
- Convalescence
- Anorexia
- Malnutrition

Medical Contraindications:

- Renal failure

CN Critical Nutrition can be diluted and will pass through most feeding tubes 14 French or larger. 1 can CN + 25 mL water recommended for most tube feeding results in 1.14 kcal/mL.

Feeding and Administration:

Pro Plan Veterinary Diets CN Critical Nutrition Canine & Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments based on the patient's condition and nutritional status. CN Critical Nutrition may be fed free-choice or by syringe or tube feeding.

FEEDING GUIDE ¹

CALORIE CONTENT (CALCULATED) ²					
			1325 kcal/kg		
			601 kcal/lb		
			206 kcal/5.5-oz can		
			1.35 kcal/mL ⁵		

Critical Care:

Highly digestible to promote optimal nutrient absorption

Energy-dense to provide needed calories

Provides essential amino acids for protein synthesis and tissue repair

High fat to provide energy density

- Smooth consistency to allow for syringe or tube feeding
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

Ingredients:

Water, meat by-products, beef, liver, poultry giblets, corn oil, rice flour, salmon, artificial and natural flavors, pork fat (preserved with TBHQ and citric acid), tricalcium phosphate, potassium chloride, guar gum, oat hulls, calcium sulfate, magnesium sulfate, DL-Methionine, taurine, Vitamin E supplement, choline chloride, zinc sulfate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, manganese sulfate, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, sodium selenite. Glucose Management:

High protein and low carbohydrate to help support the unique nutritional needs of diabetic cats

May help promote insulin sensitivity and reduce external insulin requirements

May help reduce postprandial hyperglycemia

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- High protein content to help maintain lean body mass and ideal body condition
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Poultry by-product meal, soy protein isolate, corn protein meal, soy flour, animal fat preserved with mixed-tocopherols, corn starch, liver flavor, calcium carbonate, phosphoric acid, gelatin, fish oil, potassium chloride, choline chloride, DL-Methionine, taurine, powdered cellulose, salt, Vitamin E supplement, L-Lysine monohydrochloride, zinc sulfate, niacin (Vitamin B-3), ferrous sulfate, manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, copper sulfate, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), calcium iodate, sodium selenite. EN**GASTROENTERIC®**

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Vomiting and diarrhea
- Gastritis and enteritis
- Pancreatitis
- Chronic Enteropathy/Inflammatory Bowel Disease
- Hepatic lipidosis

Medical Contraindications:

- Renal failure
- Hepatic encephalopathy

Feeding and Administration:

Pro Plan Veterinary Diets EN Gastroenteric Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for growth of kittens and maintenance of adult cats. Animal feeding tests using AAFCO procedures substantiate that Purina Pro Plan Veterinary Diets EN Gastroenteric Feline Formula provides complete and balanced nutrition for growth of kittens and maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Energy-dense for feeding reduced meal volume

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Contains a select prebiotic fiber to support GI microbiome balance and digestive health (wet)

- High protein for the unique requirements of cats with GI conditions

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- Added B-complex vitamins
- Moderate fat provides energy
- Contains omega-3 fatty acids from fish oil
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Soy protein isolate, poultry by-product meal, corn protein meal, soy flakes, animal fat preserved with mixed-tocopherols, corn starch, natural flavor, calcium carbonate, phosphoric acid, fish oil, potassium chloride, choline chloride, DL-Methionine, powdered cellulose, taurine, zinc proteinate, salt, dried colostrum, Vitamin E supplement, manganese proteinate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. ¹ Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

² Kilocalories of metabolizable energy (ME)

³ This daily amount should be divided into several small meals throughout the day.

⁴ For each additional pound of body weight, feed an additional 24 kilocalories.

EN SAVORY SELECTS® GASTROENTERIC

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Vomiting and diarrhea
- Gastritis and enteritis
- Pancreatitis
- Chronic Enteropathy/Inflammatory Bowel Disease
- Hepatic lipidosis

Medical Contraindications:

- Renal failure
- Hepatic encephalopathy

Feeding and Administration:

Pro Plan Veterinary Diets EN Savory Selects Gastroenteric With Chicken In Gravy is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for growth of kittens and maintenance of adult cats. Pro Plan Veterinary Diets EN Savory Selects Gastroenteric With Salmon In Gravy is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for growth of kittens and maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Contains a select prebiotic fiber to support GI microbiome balance and digestive health

- High protein for the unique requirements of cats with GI conditions.

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- Added B-complex vitamins
- Moderate fat provides energy
- Contains omega-3 fatty acids from fish oil
- Great taste to help ensure adequate nutrient intake

Ingredients (Chicken):

Water, meat by-products, wheat gluten, chicken, ocean fish, corn starch-modified, powdered cellulose, fish oil, inulin, tricalcium phosphate, glycine, potassium chloride, sodium bisulfate, natural flavor, taurine, salt, choline chloride, Vitamin E supplement, magnesium proteinate, zinc sulfate, ferrous sulfate, thiamine mononitrate (Vitamin B-1), niacin (Vitamin B-3), manganese sulfate, copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement. 		1731 kcal/lb	460 kcal/lb
		520 kcal/8-oz cup	158 kcal/5.5-oz can

Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Energy-dense for feeding reduced meal volume

Contains a select prebiotic fiber to support GI microbiome balance and digestive health

Natural Nutrition:

Natural with added vitamins, minerals, and nutrients. Formulated without corn, wheat, or artificial colors and flavors

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- Moderate fat provides energy (dry)
- Added B-complex vitamins
- Contains omega-3 fatty acids from fish oil
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Chicken meal, soy protein isolate, brewers rice, dried egg product, animal fat preserved with mixed-tocopherols, potato protein, brewers dried yeast, pea protein, natural flavor, cassava root flour, sodium caseinate, dried whey, potassium chloride, calcium carbonate, fish oil, phosphoric acid, sodium bisulfate, powdered cellulose, taurine, pumpkin, zinc proteinate, choline chloride, salt, dried colostrum, Vitamin E supplement, DL-Methionine, manganese proteinate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid, Vitamin D-3 supplement, biotin (Vitamin B-7), calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. C256321

Ingredients (Canned):

Meat by-products, ocean whitefish, water, chicken, long grain rice, sweet potatoes, oat hulls, inulin, guar gum, fish oil, sodium bisulfate, potassium chloride, taurine, Vitamin E supplement, magnesium proteinate, carrageenan, calcium sulfate, salt, L-Carnitine, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement. HA**HYDROLYZED®**

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

GASTROINTESTINAL

- Elimination diet trial
- Food allergic gastroenteritis
- Food intolerance
- Chronic Enteropathy/Inflammatory Bowel Disease
- Pancreatitis
- Hyperlipidemia

DERMATOLOGIC

- Elimination diet trial
- Food allergic dermatitis

Medical Contraindications:

- None

Actual Size

Feeding and Administration:

Purina Pro Plan Veterinary Diets HA Hydrolyzed Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for growth of kittens and maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE ¹		
BODY WEIGHT		DRY
lbs	kg	Approximate Number Of 8-oz Cups/Day ³

CALORIE CONTENT (CALCULATED) ²		
		3428 kcal/kg
		1555 kcal/lb
		291 kcal/8-oz cup

Gastrointestinal Health and Food Sensitivities:

Formula contains hydrolyzed protein sources to reduce the risk of allergic reaction

Single low-allergen carbohydrate source (rice starch) to help minimize the risk of an allergic reaction

Highly digestible formula to promote optimal nutrient absorption

- Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients:

Rice starch, hydrolyzed soy protein isolate, partially hydrogenated canola oil preserved with TBHQ, hydrolyzed chicken liver, calcium sulfate, powdered cellulose, hydrolyzed chicken, corn oil, tricalcium phosphate, fish oil, L-Lysine monohydrochloride, sodium bisulfate, potassium chloride, choline chloride, phosphoric acid, DL-Methionine, salt, guar gum, taurine, Vitamin E supplement, magnesium oxide, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), copper sulfate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, calcium iodate, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. NF**KIDNEY FUNCTION®****EARLY CARE**

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Chronic kidney disease – IRIS stages I and II*

Medical Contraindications:

- Growth and reproduction

* Cats in any IRIS stage of chronic kidney disease may benefit from this diet. It is important to assess and reassess your patient.

Actual Size

Feeding and Administration:

Purina Pro Plan Veterinary Diets NF Kidney Function Early Care Feline Formulas are intended for intermittent or supplemental feeding only.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE¹

BODY WEIGHT		DRY	CANNED
lbs	kg	Approximate Number Of 8-oz Cups/Day ³	Approximate Number Of 5.5-oz Cans/Day ³
5	2.3	1/4	3/4
8	3.6	3/8	1 1/4

		3668 kcal/kg	1020 kcal/kg
		1664 kcal/lb	463 kcal/lb
		448 kcal/8-oz cup	159 kcal/5.5-oz can

Renal Health:

Moderate amount of high-quality protein to support the unique nutritional requirements of cats with early-stage chronic kidney disease

Restricted phosphorus to help nutritionally manage cats with chronic kidney disease

Contains EPA, an omega-3 fatty acid, to help reduce inflammatory mediators

- Controlled sodium
- Added B-complex vitamins and potassium to help compensate for loss secondary to polyuria
- Formulated to be non-acidifying
- Energy-dense for needed calories

General Health:

- Highly digestible to promote optimal nutrient absorption
- Because calcium oxalate crystals are more prevalent in older cats⁵, this diet promotes a urinary environment unfavorable to the development of calcium oxalate crystals
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

Ingredients (Dry):

Corn protein meal, tuna, barley, whole grain corn, soybean meal, animal fat preserved with mixed-tocopherols, potato protein, liver flavor, powdered cellulose, fish oil, calcium carbonate, potassium chloride, L-Lysine monohydrochloride, salt, potassium citrate, natural flavor, choline chloride, glycine, DL-Methionine, Vitamin E supplement, taurine, zinc sulfate, ferrous sulfate, thiamine mononitrate (Vitamin B-1), niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), riboflavin supplement (Vitamin B-2), copper sulfate, Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, calcium iodate, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. †Based on digestion testing conducted at the Purina PetCare Technology Centers

- Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.
- Kilocalories of metabolizable energy (ME)
- This daily amount should be divided into several small meals throughout the day.
- For each additional pound of body weight, feed an additional 24 kilocalories.
- Forrester SD, Kruger JM, Allen TA. Feline Lower Urinary Tract Diseases. In: Hand MS, Thatcher CD, Remillard RL, Roudebush P, editors. Small Animal Clinical Nutrition. 5th ed. Topeka (KS): Mark Morris Institute; 2010 p.932.

NF**KIDNEY FUNCTION®****ADVANCED CARE**

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Chronic kidney disease – IRIS stages III and IV*
- Hepatic disease associated with encephalopathy

Medical Contraindications:

- Growth and reproduction

* Cats in any IRIS stage of chronic kidney disease may benefit from this diet. It is important to assess and reassess your patient.

Actual Size

Feeding and Administration:

Purina Pro Plan Veterinary Diets NF Kidney Function Advanced Care Feline Formulas are intended for intermittent or supplemental feeding only.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE¹

BODY WEIGHT		DRY	CANNED
lbs	kg	Approximate Number Of 8-oz Cups/Day ³	Approximate Number Of 5.5-oz Cans/Day ³
5	2.3	1/4	3/4
8	3.6	3/8	1 1/4
12	5.4	5/8	2
16	7.2	3/4	2 1/2
20	9.1	1	3 1/8
25 ⁴	11.4	1 1/4	3 3/4
		CALORIE CONTENT (FED) ²	CALORIE CONTENT (CALCULATED) ²
		3790 kcal/kg	1055 kcal/kg
		1719 kcal/lb	479 kcal/lb
		496 kcal/8-oz cup	164 kcal/5.5-oz can

Renal Health:

Reduced amount of high-quality protein to minimize the production of filtered nitrogenous waste products

Restricted phosphorus to help nutritionally manage cats with chronic kidney disease

- Contains EPA, an omega-3 fatty acid, to help reduce inflammatory mediators
- Controlled sodium
- Added B-complex vitamins and potassium to help compensate for loss secondary to polyuria
- Formulated to be non-acidifying
- Energy-dense for needed calories

General Health:

- Highly digestible to promote optimal nutrient absorption
- Because calcium oxalate crystals are more prevalent in older cats⁵, this diet promotes a urinary environment unfavorable to the development of calcium oxalate crystals
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

Ingredients (Dry):

Brewers rice, tuna, whole grain corn, soybean meal, animal fat preserved with mixed-tocopherols, corn protein meal, potato protein, dried egg product, dried yeast, liver flavor, powdered cellulose, fish oil, calcium carbonate, potassium chloride, potassium citrate, L-Lysine monohydrochloride, salt, DL-Methionine, choline chloride, taurine, Vitamin E supplement, zinc sulfate, ferrous sulfate, thiamine mononitrate (Vitamin B-1), manganese sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), copper sulfate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, calcium iodate, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. B256923

Ingredients (Canned):

Water, meat by-products, chicken hearts, rice, powdered cellulose, pork fat (preserved with TBHQ and citric acid), salmon, calcium gluconate, glycine, inulin, natural flavor, potassium chloride, fish oil, guar gum, potassium citrate, magnesium sulfate, salt, Vitamin E supplement, carrageenan, taurine, choline chloride, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), copper sulfate, manganese sulfate, pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), folic acid (Vitamin B-9), potassium iodide, Vitamin D-3 supplement, sodium selenite. OM OVERWEIGHT MANAGEMENT®

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Obesity (weight loss and weight maintenance)
- Fiber responsive gastrointestinal conditions
- Constipation
- Diabetes mellitus in overweight cats
- Hyperlipidemia in overweight cats
- Hairballs

Medical Contraindications:

- Conditions associated with catabolic states

Feeding and Administration:

Pro Plan Veterinary Diets OM Overweight Management Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats. Pro Plan Veterinary Diets OM Overweight Management Feline Formula With Ocean Whitefish and Chicken In Sauce is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight loss or maintenance.

Healthy Weight Loss:

Low in fat and calories

High protein-to-calorie ratio promotes loss of body fat while helping maintain lean body mass

Natural fiber contributes to satiety

- Added L-carnitine to help cats burn fat more effectively
- Available in dry and canned (loaf and Savory Selects) to help with long-term compliance and weight loss success
- May be fed for weight loss or weight maintenance

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Corn protein meal, wheat gluten, soybean meal, poultry by-product meal, oat hulls, soy protein isolate, brewers rice, animal fat preserved with mixed-tocopherols, fish meal, powdered cellulose, animal liver flavor, phosphoric acid, calcium carbonate, L-Lysine monohydrochloride, potassium chloride, choline chloride, salt, Vitamin E supplement, taurine, zinc sulfate, ferrous sulfate, L-Carnitine, niacin (Vitamin B-3), L-ascorbyl-2-polyphosphate (Vitamin C), thiamine mononitrate (Vitamin B-1), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), riboflavin supplement (Vitamin B-2), copper sulfate, Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. 1 Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional pound of body weight, feed an additional 24 kilocalories.

OM SAVORY SELECTS OVERWEIGHT MANAGEMENT®

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Obesity (weight loss and weight maintenance)
- Fiber responsive gastrointestinal conditions
- Constipation
- Diabetes mellitus in overweight cats
- Hyperlipidemia in overweight cats
- Hairballs

Medical Contraindications:

- Conditions associated with catabolic states

Feeding and Administration:

Pro Plan Veterinary Diets OM Savory Selects Overweight Management Feline Formula With Salmon In Sauce is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

Healthy Weight Loss:

Low in fat and calories

High protein-to-calorie ratio promotes loss of body fat while helping maintain lean body mass

Natural fiber contributes to satiety

- Added L-carnitine to help cats burn fat more effectively
- Available in dry and canned (loaf and Savory Selects) to help with long-term compliance and weight loss success
- May be fed for weight loss or weight maintenance

General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (with salmon):

Water, chicken, meat by-products, wheat gluten, corn starch-modified, powdered cellulose, artificial and natural flavors, salmon, L-Lysine monohydrochloride, potassium chloride, tricalcium phosphate, magnesium protein, salt, choline chloride, taurine, Vitamin E supplement, zinc sulfate, ferrous sulfate, thiamine mononitrate (Vitamin B-1), L-Carnitine, niacin (Vitamin B-3), manganese sulfate, copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement. UR

URINARY® St/Ox®

Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Dissolution of struvite uroliths
- Reducing the risk of calcium oxalate and struvite uroliths
- Struvite associated LUTS
- Idiopathic cystitis

Medical Contraindications:

- Renal failure
- Cardiovascular disease
- Concurrent use of urine acidifiers

Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets UR Urinary St/Ox Dry Feline Formula provides complete and balanced nutrition for maintenance of adult cats. Pro Plan Veterinary Diets UR Urinary St/Ox Canned Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight loss or maintenance.

		287 kcal/8-oz cup			173 kcal/5.5-oz can	

Urinary Management:

Promotes a urinary environment unfavorable to the development of both struvite uroliths (undersaturated, RSS<1) and calcium oxalate uroliths (metastable RSS<12)

Helps dissolve struvite uroliths

Helps reduce the risk of both struvite and calcium oxalate urolith recurrence

- Average urine pH range of 6.0-6.4
- Promotes increased urine volume to dilute the urine (dry)
- UR St/Ox canned loaf and Savory Selects diets contain > 75% moisture to contribute to total water intake

General Health:

- Moderate fat content (dry)
- High protein content to help maintain ideal body condition and lean body mass
- Available in dry and canned (loaf and Savory Selects) to help with long-term compliance
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

Ingredients (Dry):

Corn protein meal, poultry by-product meal, rice, tuna, oat fiber, soybean hulls, canola meal, soy protein isolate, beef fat preserved with mixed-tocopherols, liver flavor, powdered cellulose, salt, calcium carbonate, phosphoric acid, potassium chloride, sodium bisulfate, choline chloride, L-Lysine monohydrochloride, Vitamin E supplement, DL-Methionine, taurine, fish oil, L-Carnitine, L-ascorbyl-2-polyphosphate (Vitamin C), niacin (Vitamin B-3), zinc sulfate, Vitamin A supplement, ferrous sulfate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, manganese sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), copper sulfate, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), biotin (Vitamin B-7), Vitamin D-3 supplement, calcium iodate, sodium selenite. E256723

Ingredients (Canned):

Meat by-products, liver, chicken, poultry by-products, water, rice, calcium gluconate, oat hulls, guar gum, sodium bisulfate, potassium chloride, salt, Vitamin E supplement, tricalcium phosphate, taurine, carrageenan, zinc sulfate, ferrous sulfate, thiamine mononitrate (Vitamin B-1), niacin (Vitamin B-3), manganese sulfate, copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), folic acid (Vitamin B-9), potassium iodide, Vitamin D-3 supplement. Calming Care

Medical Indications:

Calming Care is recommended as a probiotic supplement to help dogs with the following:

- Anxiety
- Fear
- Stress

Behavioral Health:

Proprietary use of probiotic strain BL999 to help dogs maintain calm behavior

Helps dogs cope with external stressors like separation, unfamiliar visitors, novel sounds, or changes in routine and location

Helps dogs maintain positive cardiac activity during stressful events, promoting a positive emotional state

- In a blinded crossover design study, 90% of dogs showed an improvement in displaying anxious behaviors such as excessive vocalization, jumping, pacing, and spinning
- Helps blunt cortisol response to anxious events and supports a healthy immune system
- Contains a probiotic with 1×10^9 CFU of *Bifidobacterium longum* BL999 per packet to support balanced behavior

General Health:

- Excellent palatability

*Relevation Veterinary Tracker, 2023

Proprietary use of probiotic strain BL999 to help cats maintain calm behavior

Helps promote positive behaviors such as playing and seeking out social contact

Helps cats cope with changes in routine and location

- Improvement shown in cats displaying anxious behaviors such as pacing
- Helps reduce sneezing associated with FHV-1
- Helps blunt cortisol, a marker of stress, and supports a healthy immune system

General Health

- Great taste

Liver flavor, maltodextrin
B-9300

FortiFlora®

Medical Indications:

FortiFlora is recommended as a probiotic supplement to help with the following:

- Diarrhea associated with microflora imbalance
- Acute enteritis
- Diarrhea associated with stress, antibiotic therapy, and diet change
- Poor fecal quality in puppies
- To promote a strong immune system
- Flatulence
- To enhance palatability

Medical Contraindications:

- Severely immune compromised dogs

Gastrointestinal Health:

- Probiotic supplement for the management of puppies and adult dogs with diarrhea
- Contains a probiotic proven to promote normal intestinal microflora
- Proprietary microencapsulation process for enhanced stability
- Contains a guaranteed level of viable microorganisms
- Increases levels of the beneficial bacteria *Bifidobacteria* and *Lactobacilli* in dogs
- When used in combination with metronidazole, diarrhea in dogs is shown to improve faster than with metronidazole alone
- Helps reduce flatulence in dogs

Immune Health:

- Promotes a strong immune system at both the local and systemic levels
- Promotes increased fecal IgA levels in adult dogs

General Health:

- Shown to be safe for use in growing and adult dogs
- Easy to administer
- Enhances palatability

FortiFlora® PRO

SYNBIOTIC ACTION

Medical Indications:

- Stool quality responsive to fiber
- To increase microbial diversity
- Diarrhea associated with microflora imbalance
- Diarrhea associated with stress and antibiotic therapy
- Poor fecal quality in dogs
- To promote a strong immune system
- To enhance palatability

Medical Contraindications:

- Severely immune compromised canines

Gastrointestinal Microbiome Health:

- Synbiotic action of probiotics and prebiotic fiber for the management of dogs with diarrhea and to support a healthy intestinal microbiome
- Contains prebiotic fiber to increase gastrointestinal microbial diversity
- Contains prebiotic fiber (psyllium) to stimulate the growth of specific bacteria, including *Lactobacillus* and *Bifidobacterium* species

Immune Health:

- Supports a strong immune system
- Contains the same probiotic strain in FortiFlora, which promotes increased fecal IgA levels in adult dogs

Gastrointestinal Health:

- Contains the same probiotic strain in FortiFlora, proven to promote normal intestinal microflora
- Probiotic supplement for the management of puppies and adult dogs with diarrhea
- Proprietary microencapsulation of probiotic for enhanced stability
- Contains a guaranteed level of live microorganisms
- Contains a probiotic that when used in combination with metronidazole, is shown to improve diarrhea in dogs faster than with metronidazole alone

General Health:

- Safe for use in growing and adult dogs
- Easy to administer
- Excellent palatability

Hydra Care®

Medical Indications:

Hydra Care is recommended as a supplement for cats:

- Who would benefit from additional water intake

Medical Contraindications:

- Food allergies

General Health:

- Cats consume on average 50% more liquid each day*
- Shown to decrease urine specific gravity and osmolality*
- Helps support healthy hydration
- Added nutritional osmolytes support hydration
- Easy to feed

*Compared to cats consuming only water in addition to dry feeding.

Cats must consume at least 2 oz per 5 lb of body weight daily for benefit.

Multi Care

SKIN + IMMUNE + GUT

Medical Indications:

Dogs that may benefit from additional gastrointestinal, skin, and immune support

Medical Contraindications:

- Food allergies

Multiple Benefits:

- Formulated with multi-active blends to proactively support skin, digestive, and immune health
- Contains a blend of prebiotic fiber, a probiotic, and postbiotics to support digestive and immune health

Immune Health:

- Immune blend with L-Glutamine, a probiotic, postbiotics, Vitamin E & zinc to support a strong immune system:
 - L-Glutamine contributes energy to immune cells
 - Live probiotics help support gut microbiome resilience during naturally occurring stress
 - Postbiotics support a strong immune system and promote normal antibody production
 - Antioxidants support a strong immune system and help fight free radicals

Dermatologic Health:

- Derm blend with omega-3 fatty acids, Vitamin E, zinc, and biotin supports skin health & dogs with sensitive skin

Gastrointestinal Health:

- Gut blend with prebiotic fiber and a probiotic to support digestive and microbiome health

Dental Chewz

Clinical Considerations:

An effective dental chew for dogs, these treats are long-lasting, delicious and high in protein. Dental Chewz have been recognized by the Veterinary Oral Health Council as a product that works effectively to significantly reduce tartar buildup in dogs fed two treats per day, and are backed by extensive testing. These treats are a perfect complement to DH Dental Health® Canine Formulas and a great treat for healthy dogs.

Medical Indications:

Dental Chewz are recommended for the following:

- Dogs on DH Dental Health
- Normal healthy dogs on a maintenance diet
- Dogs that are prone to tartar accumulation

Treat Characteristics:

Dental Chewz have been formulated with the following characteristics:

- Long-lasting chew cleans teeth and freshens breath
- VOHC Seal of Acceptance: helps control tartar
- High protein
- Long-lasting
- Great taste

Feeding and Administration:

Give your adult dog at least two Pro Plan Veterinary Diets Dental Chewz daily to help reduce tartar buildup and help keep his teeth clean.

Digestive Health Bites

Medical Indications:

Digestive Health Bites are recommended for the following:

- Dogs that may benefit from added prebiotic fiber
- Healthy dogs on a maintenance diet

Treat Characteristics:

Digestive Health Bites have been formulated with the following characteristics:

- Contains natural prebiotic fiber to help promote digestive health
- Real chicken is the #1 ingredient
- No artificial colors and flavors
- Vitamins C & E to help support the immune system
- Great taste

Actual Size

Feeding and Administration:

Feed as a treat to your adult dog. This product is a treat and is not intended to be fed as a meal. The caloric intake from treats should not exceed 10% of a dog's total daily caloric requirement. If treats are given, the amount of food should be reduced accordingly.

Gentle Snackers®

HYDROLYZED + LOW FAT

Clinical Considerations:

Pet owners love to give their pets treats, but treats are often restricted for dogs on special diets. Purina® Pro Plan® Veterinary Diets Gentle Snackers® Hydrolyzed + Low Fat canine treats offer a hydrolyzed option, as well as a low-fat treat for dogs on a weight loss/maintenance program. Based on Purina® Pro Plan® Veterinary Diets HA Hydrolyzed® Canine Formula, these crunchy treats can be given to dogs with adverse food reactions.

Medical Indications:

Gentle Snackers is recommended for the following:

- Dogs with adverse food reactions
- Dogs with sensitive gastrointestinal tracts
- Dogs on a weight loss program
- Healthy dogs on a maintenance diet

Medical Contraindications:

- None

Treat Characteristics:

Gentle Snackers has been formulated with the following characteristics:

- Low molecular weight
- Low fat
- Single hydrolyzed protein source
- Great taste

Actual Size

Feeding and Administration:

Feed 3 treats per 5 pounds of body weight, not to exceed 20 treats per day. The calorie intake from treats should not exceed 10% of a dog's total daily caloric requirement. If treats are given, the amount of food should be reduced accordingly.

Dental Bites

Clinical Considerations:

Every client enjoys giving their pet a treat—especially if that treat can also help clean their cat's teeth and comply with their weight loss or maintenance diet. At less than 2 kcals per treat, Purina® Pro Plan® Veterinary Diets Dental Bites feline treats work effectively to help control buildup of tartar and can be used as part of a weight loss or maintenance program, or as a calorie-smart treat with any diet. These crunchy bites also help to clean teeth and freshen breath.

Medical Indications:

Dental Bites are recommended for the following:

- Cats on a weight loss program
- Healthy cats on a maintenance diet

Treat Characteristics:

Dental Bites have been formulated with the following characteristics:

- Works effectively to help control buildup of tartar
- Less than 2 kcals per treat
- Crunchy texture helps clean teeth, freshen breath, and control tartar
- VOHC Seal of Acceptance: helps control tartar
- Natural Chicken & Liver Flavors

www.VOHC.org

Actual Size

Feeding and Administration:

Feed as a treat to your adult cat. This product is a treat and is not intended to be fed as a meal. For optimal dental benefit, feed 17 treats daily to adult cats weighing 5 pounds or more. Do not feed to cats that weigh less than 5 pounds. The caloric intake from treats should not exceed 10% of a cat's total daily requirement. If treats are given, the amount of food should be reduced accordingly. Provide adequate fresh water in a clean container daily. For your pet's health, see your veterinarian regularly.

Ingredients:

Ground yellow corn, chicken meal, corn protein meal, animal digest, beef fat preserved with mixed-tocopherols, powdered cellulose, fish meal, natural liver flavor, glycerin, calcium carbonate, natural flavor, dried yeast, Vitamin E supplement, tricalcium phosphate. B250123

Urinary Health Treats

Clinical Considerations:

Clients who own cats with urinary issues are often looking for a variety of ways to help their pets. Purina® Pro Plan® Veterinary Diets Urinary Health Treats feline treats support urinary health. And when fed in conjunction with Purina® Pro Plan® Veterinary Diets UR Urinary® St/Ox®, these treats help reduce the risk of both struvite and calcium oxalate stone recurrence.

Medical Indications:

Urinary Health Treats is recommended for the following:

- Cats with a history of feline lower urinary tract disease
- Cats eating a urinary diet

Treat Characteristics:

When fed in conjunction with Purina Pro Plan Veterinary Diets UR Urinary St/Ox, these treats help reduce the risk of both struvite and calcium oxalate stone recurrence.

- Supports urinary health
- When fed in conjunction with Purina Pro Plan Veterinary Diets UR Urinary St/Ox, these treats help reduce the risk of both struvite and calcium oxalate stone recurrence
- High-quality protein
- Contains antioxidants

Actual Size

Feeding and Administration:

Feed as a treat to your adult cat in combination with Purina Pro Plan Veterinary Diets UR Urinary St/Ox feline cat food formulas. This product is a treat and is not intended to be fed as a meal. Feed up to 2 treats for each 1 pound of body weight, not to exceed 20 treats per day. The caloric intake from treats should not exceed 10% of a cat's total caloric requirement. If treats are given, the amount of food should be reduced accordingly. Provide adequate fresh water in a clean container daily. For your pet's health see your veterinarian regularly.

Your Pet, Our Passion.®

Daily Nutrition Matters®

BOOST YOUR KNOWLEDGE OF NUTRITION

Daily Nutrition Matters® is an online educational program that you can complete at your own pace to learn more about nutrition for dogs and cats. This mobile-friendly, convenient program combines in-depth information with interactive graphics and case studies to create engaging learning opportunities about pet nutrition in health and various disease states.

EARN FREE CE CREDIT

Daily Nutrition Matters modules are AAVSB RACE approved for veterinarians and veterinary technicians. The modules below are eligible for up to **17 hours of CE credit**.*

1.5 HOURS of CE credit

DIGESTION & NUTRIENTS

1 HOUR of CE credit

PET FOOD INGREDIENTS

CHOOSING A PET FOOD

FEEDING CATS

FEEDING DOGS

GASTROINTESTINAL DISEASE

FOOD ALLERGY & INTOLERANCE

MICROBIOME

LOWER URINARY TRACT DISEASE

OBESITY & WEIGHT MANAGEMENT

CANINE COGNITIVE DYSFUNCTION SYNDROME & CANINE EPILEPSY

CARDIOVASCULAR DISEASE

NUTRITION MYTHS & FACTS: PART 1

NUTRITION MYTHS & FACTS: PART 2

.5 HOUR of CE credit

KIDNEY DISEASE

OSTEOARTHRITIS

DIABETES MELLITUS

LIVER DISEASE

DENTAL DISEASE

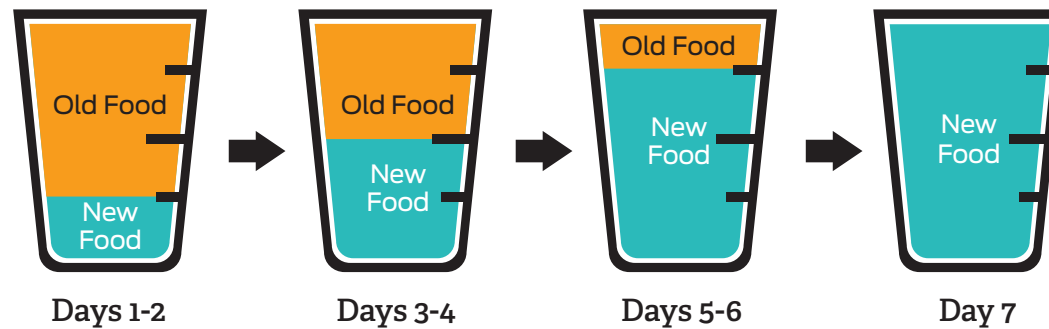

TO START EARNING CREDITS, VISIT WWW.DAILYNUTRITIONMATTERS.COM

* This program was reviewed and approved by the AAVSB RACE program for up to a total of 17 hours of continuing education in jurisdictions that recognize AAVSB RACE approval. Please contact the AAVSB RACE program if you have any comments/concerns regarding this program's validity or relevance to the veterinary profession.

Food Transitioning Made Simple

When pets suddenly switch from one diet to another, it can cause gastrointestinal upset and other issues. That's why it is important to slowly introduce your pet to a new diet over the course of 7 days. Gradually replace the old food with new food, increasing the amount every 1-2 days.

RECOMMENDED DIET: _____

Please follow your veterinarian's instructions for total feeding amounts. Contact your veterinarian if you have questions or concerns.

Purina Pro Plan Vet Direct makes home delivery for clients hassle-free, with an easy-to-use website, free shipping, customer incentives, and more. Learn more and enroll today at ProPlanVetDirect.com.

GI Diets Made By Experts

EL ELEMENTAL

- Elimination diet trial
- Adverse food reaction
 - Food allergic dermatitis
 - Food allergic gastroenteritis
 - Food intolerance
- Inflammatory bowel disease
- Idiopathic chronic enteropathy
- Protein-losing enteropathy
- Short bowel syndrome

HA HYDROLYZED

- Elimination diet trial
- Food allergic gastroenteritis
- Food intolerance
- Inflammatory bowel disease (IBD)
- Lymphangiectasia
- Protein-losing enteropathy
- Pancreatitis
- Exocrine pancreatic insufficiency (EPI)
- Malabsorption

EN GASTROENTERIC

- Vomiting and diarrhea
- Gastritis and enteritis
- Malabsorption and maldigestion
- Pancreatitis
- Exocrine pancreatic insufficiency (EPI)
- Inflammatory bowel disease (IBD)
- Hepatic disease not associated with encephalopathy

EN GASTROENTERIC NATURALS

- Vomiting and diarrhea
- Gastritis and enteritis
- Malabsorption and maldigestion
- Pancreatitis
- Exocrine pancreatic insufficiency (EPI)
- Inflammatory bowel disease (IBD)
- Hepatic disease not associated with encephalopathy

EN GASTROENTERIC LOW FAT

- Hyperlipidemia
- Lymphangiectasia
- Pancreatitis
- Protein-losing enteropathy
- Inflammatory bowel disease (IBD)
- Exocrine pancreatic insufficiency (EPI)
- Vomiting and diarrhea

EN GASTROENTERIC FIBER BALANCE

- Fiber responsive colitis
- Large bowel diarrhea
- Constipation
- Diabetes mellitus

- Diarrhea associated with microflora imbalance
- Acute enteritis
- Diarrhea associated with stress, antibiotic therapy, and diet change
- Poor fecal quality in puppies
- Promotes a strong immune system
- Flatulence
- To enhance palatability

- Stool quality responsive to fiber
- To increase microbial diversity
- Constipation (Feline only)
- Diarrhea associated with microflora imbalance
- Diarrhea associated with stress and antibiotic therapy
- To promote strong immune system
- To enhance palatability

Purina® Pro Plan® Veterinary Diets offers a comprehensive line of effective options for patients with GI issues, each led by purpose and backed by science. **Learn more at PurinaProPlanVets.com.**

Fecal Scoring Chart

SCORE	SPECIMEN EXAMPLE	CHARACTERISTICS
1		<ul style="list-style-type: none"> · Very hard and dry · Often expelled as individual pellets · Requires much effort to expel from body · Leaves no residue on ground when picked up
2		<ul style="list-style-type: none"> · Firm, but not hard, pliable · Segmented in appearance · Little or no residue on ground when picked up
3		<ul style="list-style-type: none"> · Log shaped, moist surface · Little or no visible segmentation · Leaves residue on ground, but holds form when picked up
4		<ul style="list-style-type: none"> · Very moist and soggy · Log shaped · Leaves residue on ground and loses form when picked up
5		<ul style="list-style-type: none"> · Very moist but has a distinct shape · Present in piles rather than logs · Leaves residue on ground and loses form when picked up
6		<ul style="list-style-type: none"> · Has texture, but no defined shape · Present as piles or spots · Leaves residue on ground when picked up
7		<ul style="list-style-type: none"> · Watery · No texture · Present in flat puddles

Nutritional Management of GI Health

CHARACTERISTICS	SMALL BOWEL CLINICAL SIGNS*	LARGE BOWEL CLINICAL SIGNS*
Defecation frequency	Normal to slightly increased	Markedly increased
Fecal volume	Normal to increased	Markedly decreased
Fecal quality	Very watery to semi-formed (typical score 6, 7)	Semi-formed, gelatinous (typical score 4, 5)
Frequent urges to defecate	Normal to slightly increased	Markedly increased
Tenesmus (Straining)	Absent	Present
Blood in feces	Dark, old blood, tarry	Bright red, fresh-looking
Mucus in feces	Rarely	Frequently
Fatty stool	Sometimes	No

RECOMMENDED FORMULAS

Canine – Small Bowel

Feline – Small Bowel

Canine – Large Bowel

Feline – Large Bowel

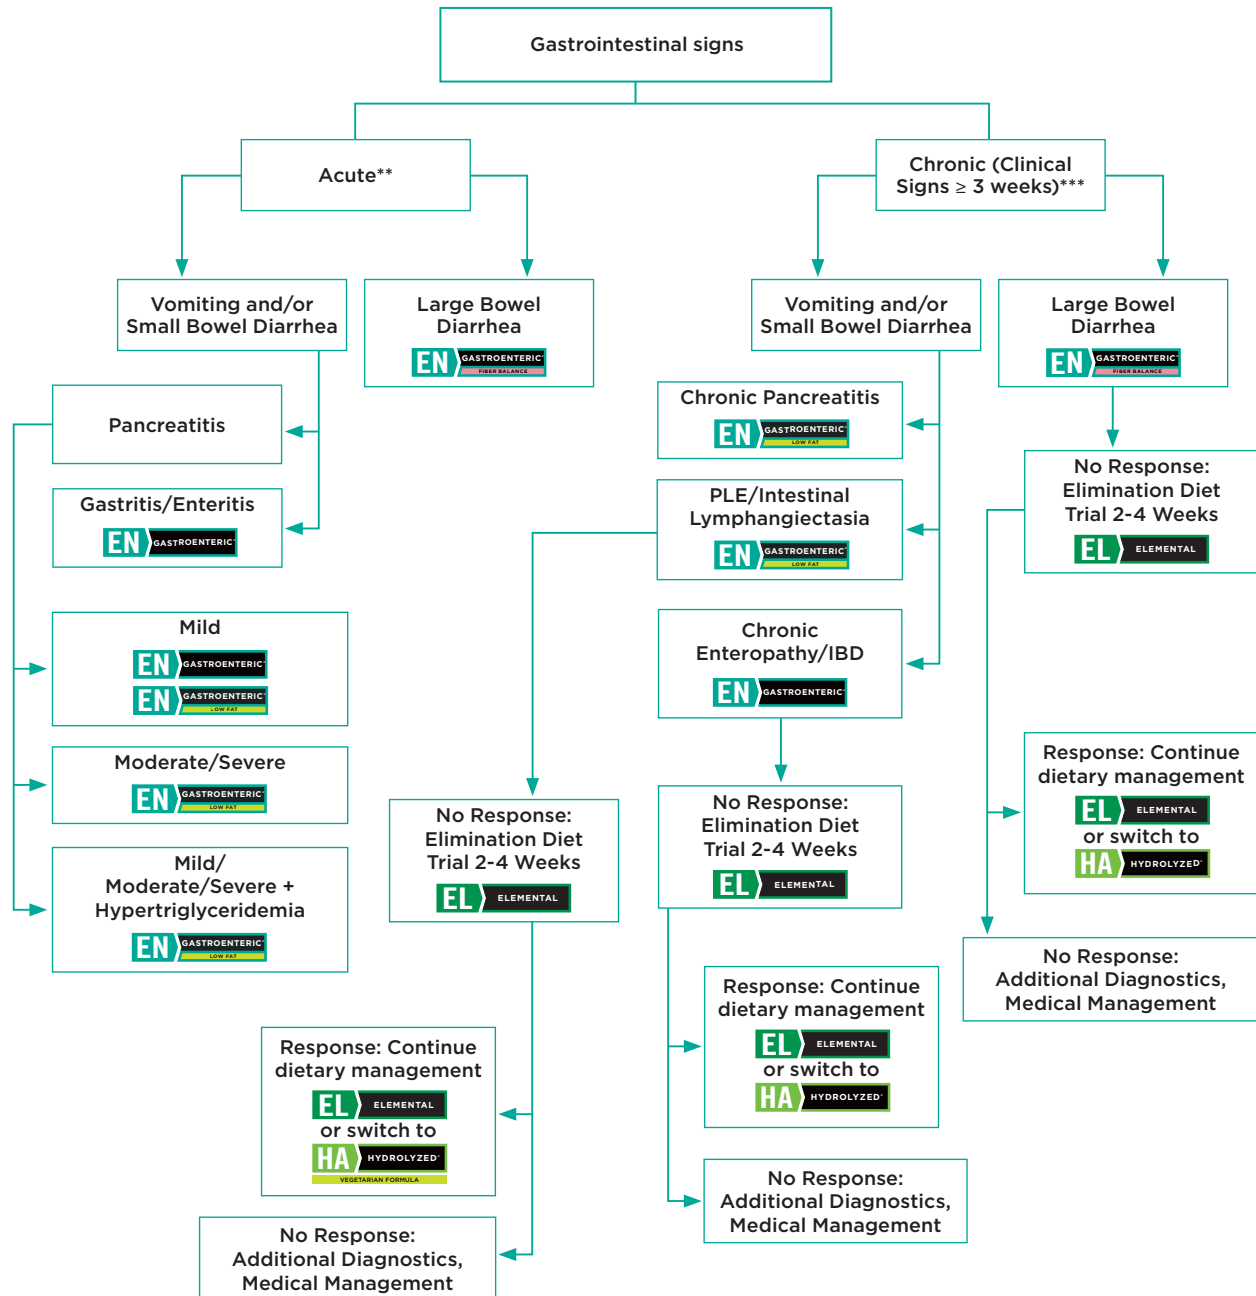

*In some cases both small bowel and large bowel are affected and clinical signs will vary.

EVALUATING PATIENTS WITH GI CONDITIONS

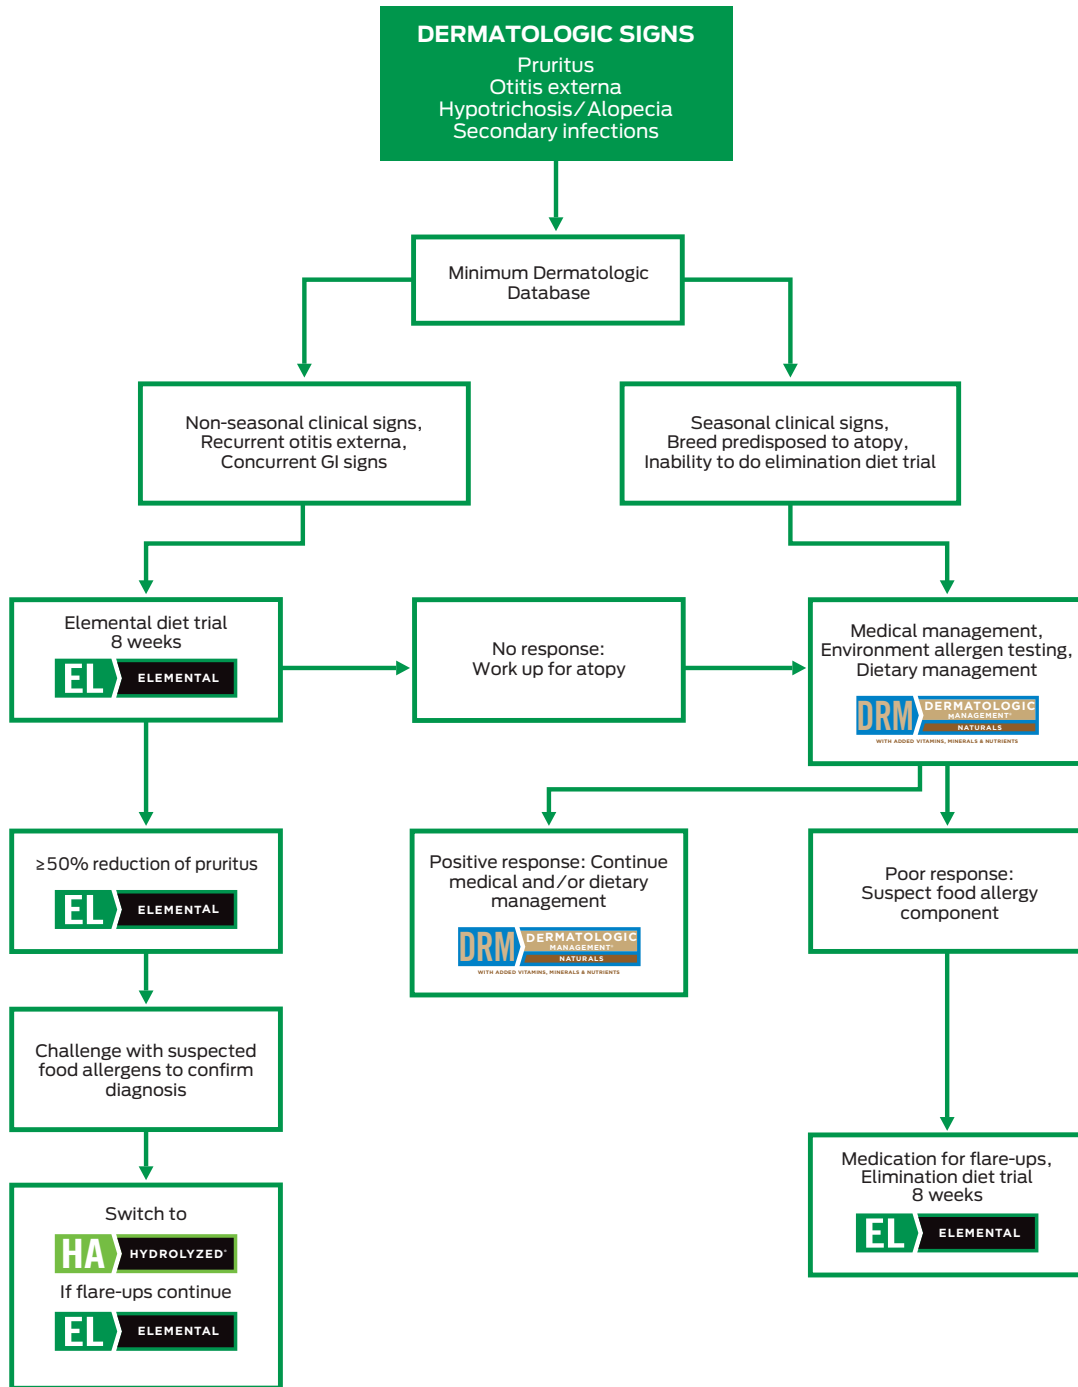

*Listed formulas are initial diet recommendations. Diet Selection may vary depending on patient's clinical signs and comorbidities. Further dietary modifications may be required based on clinical response and chronicity.

**Diagnostics for acute gastrointestinal signs can include Fecal O&P and antigen testing, Fecal PCR Panel, CBC, Serum Chemistry, Urinalysis, SNAP cPL or Spec cPL, Imaging (Abdominal Ultrasound, X-Rays).

***Additional Diagnostics for chronic gastrointestinal signs include B-12/Folate, TLI, Resting Cortisol or ACTH Stimulation Test, GI Biopsies.

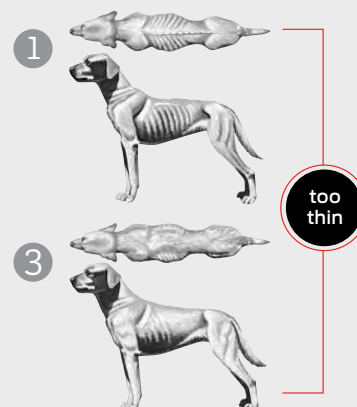

Diet Decision Tree for Canine Adverse Food Reactions

Canine Body Condition System

1. Ribs, lumbar vertebrae, pelvic bones and all bony prominences evident from a distance. No discernible body fat. Obvious loss of muscle mass.
2. Ribs, lumbar vertebrae, pelvic bones easily visible. No palpable fat. Some evidence of other bony prominence. Minimal loss of muscle mass.
3. Ribs easily palpated and may be visible with no palpable fat. Tops of lumbar vertebrae visible. Pelvic bones becoming prominent. Obvious waist and abdominal tuck.

4. Ribs easily palpable, with minimal fat covering. Waist easily noted, viewed from above. Abdominal tuck evident.
5. Ribs palpable, without excess fat covering. Waist observed behind ribs when viewed from above. Abdomen tucked up when viewed from side.

6. Ribs palpable with slight excess fat covering. Waist is discernible viewed from above but is not prominent. Abdominal tuck apparent.
7. Ribs palpable with difficulty. Heavy fat cover. Noticeable fat deposits over lumbar area and base of tail. Waist absent or barely visible. Abdominal tuck may be present.
8. Ribs not palpable under very heavy fat cover, or palpable only with significant pressure. Heavy fat deposits over lumbar area and base of tail. Waist absent. No abdominal tuck. Obvious abdominal distention may be present.
9. Massive fat deposits over thorax, spine and base of tail. Waist and abdominal tuck absent. Fat deposits on neck and limbs. Obvious abdominal distention.

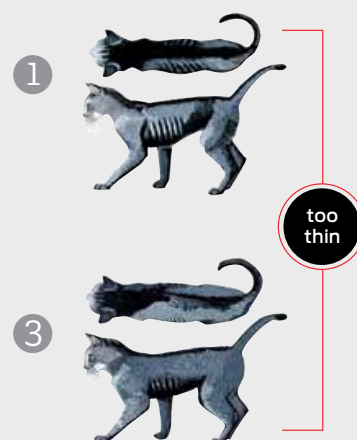

Questions? Contact your Purina Veterinary Sales Consultant (PVC) or the Purina Veterinary Resource Center at 1-800-222-VETS (8387) 8:00 AM–6:00 PM WEEKDAYS, CST.

Purina trademarks are owned by Société des Produits Nestlé S.A. Printed in USA. VET3693C-0223

Feline Body Condition System

1. Ribs visible on short-haired cats. No palpable fat. Severe abdominal tuck. Lumbar vertebrae and wings of ilia easily palpated.
2. Ribs easily visible on short-haired cats. Lumbar vertebrae obvious with minimal muscle mass. Pronounced abdominal tuck. No palpable fat.
3. Ribs easily palpable with minimal fat covering. Lumbar vertebrae obvious. Obvious waist behind ribs. Minimal abdominal fat.
4. Ribs palpable with minimal fat covering. Noticeable waist behind ribs. Slight abdominal tuck. Abdominal fat pad absent.

5. Well-proportioned. Observe waist behind ribs. Ribs palpable with slight fat covering. Abdominal fat pad minimal.

6. Ribs palpable with slight excess fat covering. Waist and abdominal fat pad distinguishable but not obvious. Abdominal tuck absent.
7. Ribs not easily palpated with moderate fat covering. Waist poorly discernible. Obvious rounding of abdomen. Moderate abdominal fat pad.
8. Ribs not palpable with excess fat covering. Waist absent. Obvious rounding of abdomen with prominent abdominal fat pad. Fat deposits present over lumbar area.
9. Ribs not palpable under heavy fat cover. Heavy fat deposits over lumbar area, face and limbs. Distention of abdomen with no waist. Extensive abdominal fat deposits.

The BODY CONDITION SYSTEM was developed at the Nestlé Purina PetCare Center and has been validated as documented in the following publications:
 D. Mawby, J. W. Bartges, T. Mayers, et al. "Comparison of body fat estimates by dual-energy X-ray absorptiometry and deuterium oxide dilution in client owned dogs," *Compendium* 23(9A) (2001): 70; D. P. Laflamme, "Development and Validation of a Body Condition Score System of Dogs," *Canine Practice* July/August 22 (1997): 10-15
 Kealy, et al. "Effects of Diet Restriction on Life Span and Age-Related Changes in Dogs," *JAVMA* 220 (2002): 1315-1320

EXPLORING THE GUT MICROBIOME AND ITS ROLE IN YOUR PATIENTS' HEALTH

The gastrointestinal tract is primarily known as the system responsible for digestion and nutrient absorption. But it also plays a remarkable role in overall health—both for humans and pets.

The Gut Is Home to:

70%

of the immune cells, protecting the body from harmful (pathogens) or foreign substances (antigens).¹

A complex microbial ecosystem with trillions of microorganisms, known as the gut microbiome.

How Is the Microbiome Linked to Health?

The microbiome can impact a pet's overall health in many ways:²

Why Is Microbiome Balance So Important?

Because the microbiota in the gut help support overall health, it is important to maintain a balance between beneficial and potentially pathogenic bacteria. An imbalanced or maladapted microbiota is called dysbiosis, which can be associated with a variety of health conditions.

What can lead to dysbiosis?

- | | |
|-------------|-------------|
| Antibiotics | Illness |
| Stress | Diet change |
| Age | Weaning |

How Can You Help? Promote Microbiome Balance.

PREBIOTICS

A substrate that is selectively utilized by host microorganisms conferring a health benefit on the host.³

PROBIOTICS

Live microorganisms that, when administered in adequate amounts, confer a health benefit on the host.⁴

COLOSTRUM

Contains bioactives and antibodies that initiate a beneficial immune response and help to stabilize intestinal microflora.⁵

Studies show that when fed diets supplemented with bovine colostrum bio-actives, both kittens⁶ and adult dogs⁵ have stronger responses to vaccinations.

FortiFlora® PRO Synbiotic Action contains a powerful combination of probiotics and prebiotic fiber.

FortiFlora® contains a special strain of beneficial bacteria, *Enterococcus faecium* SF68®.

EN Gastroenteric® formulas contain colostrum (dry) and a select prebiotic fiber.

Multi Care contains a blend of prebiotic fiber, a probiotic, and postbiotics to support digestive and immune health.

Your Pet, Our Passion.®

WHAT IS DISHAA?

DISHAA is a tool to help veterinarians and owners assess the mental acuity of a dog, and for veterinarians to potentially diagnose Cognitive Dysfunction Syndrome (CDS).

The prevalence of CDS increases with age¹:

- 8–10 years: 3.4%
- 10–12 years: 5%
- 12–14 years: 23.3%
- >14 years: 41%

Cognitive Dysfunction Syndrome may be diagnosed using the DISHAA questionnaire. In order for a dog to be diagnosed with CDS, owners must observe their dog exhibiting signs across several DISHAA categories.

D DISORIENTATION	<ul style="list-style-type: none"> Gets stuck, difficulty getting around objects, goes to hinge side of door Stares blankly at walls, floor, or into space Does not recognize familiar people/familiar pets Gets lost in home or yard Less reactive to visual (sights) or auditory (sounds) stimuli
I SOCIAL INTERACTIONS	<ul style="list-style-type: none"> More irritable/fearful/aggressive with visitors, family or other animals Decreased interest in approaching, greeting or affection/petting
S SLEEP/WAKE CYCLES	<ul style="list-style-type: none"> Pacing/restless/sleeps less/waking at night Vocalization at night
H HOUSESOILING, LEARNING AND MEMORY	<ul style="list-style-type: none"> Less able to learn new tasks or respond to previously learned commands/name/work Indoor soiling of urine or stool/decreased signaling to go out Difficulty getting dog's attention/increased distraction/decreased focus
A ACTIVITY	<ul style="list-style-type: none"> Decrease in exploration or play with toys, family members, other pets Increased activity including aimless pacing or wandering Repetitive behaviors, e.g., circling, chewing, licking, star gazing
A ANXIETY	<ul style="list-style-type: none"> Increased anxiety when separated from owners More reactive/fearful to visual (sights) or auditory (sounds) stimuli Increased fear of places/locations (e.g., new environments/going outdoors)

¹Salvin, H. E., McGreevy, P. D., Sachdev, P. S., & Valenzuela, M. J. (2010). Under diagnosis of canine cognitive dysfunction: a cross-sectional survey of older companion dogs. *Veterinary Journal* (London, England : 1997), 184(3), 277–81. doi:10.1016/j.tvjl.2009.11.007

INTERNATIONAL RENAL INTEREST SOCIETY RECOMMENDATIONS

IRIS was created to help practitioners better diagnose, understand, and treat renal disease in cats and dogs. They have created an internationally recognized set of guidelines for classifying and treating kidney disease. The staging system is not used to make a diagnosis of chronic kidney disease but is used to facilitate appropriate treatment, monitoring, and further diagnostics.

The IRIS staging system is based primarily on serum creatinine concentrations of well-hydrated dogs and cats. For further staging and recommendations, please visit: <http://www.iris-kidney.com/guidelines/staging.html>

STAGE	BLOOD CREATININE* μmol/l mg/dl SDMA# μg/dl		COMMENTS
	DOGS	CATS	
1	<125 <1.4 <18	<140 <1.6 <18	Normal blood creatinine or normal or mild increase blood SDMA. Some other renal abnormality present (such as, inadequate urinary concentrating ability without identifiable non-renal cause (in cats not dogs), abnormal renal palpation or renal imaging findings, proteinuria of renal origin, abnormal renal biopsy results, increasing blood creatinine or SDMA concentrations in samples collected serially). Persistently elevated blood SDMA concentration (>14 μg/dl) may be used to diagnose early CKD.
2	125-250 1.4-2.8 18-35	140-250 1.6-2.8 18-25	Normal or mildly increased creatinine, mild renal azotemia (lower end of the range lies within reference ranges for creatinine for many laboratories, but the insensitivity of creatinine concentration as a screening test means that patients with creatinine values close to the upper reference limit often have excretory failure). Mildly increased SDMA. Clinical signs usually mild or absent.
3	251-440 2.9-5.0 36-54	251-440 2.9-5.0 26-38	Moderate renal azotemia. Many extrarenal signs may be present, but their extent and severity may vary. If signs are absent, the case could be considered as early Stage 3, while presence of many or marked systemic signs might justify classification as late Stage 3.
4	>440 >5.0 >54	>440 >5.0 >38	Increasing risk of systemic clinical signs and uremic crises.

*The blood creatinine concentrations apply to average size dogs – those of extreme size may vary.

#The recommendations for SDMA are based on published literature which utilizes proprietary IDEXX technology for measuring SDMA. At this time, it is not known if other assays will provide equivalent results.

Added color	Added color is any dye, pigment, or other substance that can impart color to food. It adds variety and richness to the appearance and appeal of foods
Amino acids	Building blocks of proteins. Amino acids can be classified as essential, non-essential, and conditionally essential. Examples include alanine, arginine, asparagine, aspartate, cysteine, glutamate, glutamine, glycine, histidine, isoleucine, leucine, lysine, methionine, phenylalanine, proline, serine, taurine, threonine, tryptophan, tyrosine, and valine
Animal digest	Animal digest is created from protein sources such as the muscle and soft tissue of pork and poultry. It's highly palatable and used to enhance the taste of pet food
Animal fat preserved with mixed-tocopherols	Pork, beef, or poultry fat preserved with mixed-tocopherols
Animal liver flavor	Animal liver flavor enhances flavor and aids in palatability
Ascorbic acid	Source of vitamin C, an antioxidant
Barley	Cereal grain providing a high-quality carbohydrate source
Beef	High-quality protein source that provides essential amino acids
Beta-Carotene	Member of the carotenoid family; from plants such as carrots and pumpkins. A source of vitamin A in dogs (cats cannot convert carotenoids to vitamin A); helps support healthy vision
BHA	Butylated hydroxytoluene; a preservative used in pet foods and also approved by the FDA for use in human foods
<i>Bifidobacterium longum</i> BL999	Bacterium found in the gut of many animals, including dogs and humans. Used in probiotics, can be helpful in nutritionally managing dogs/cats with anxious behaviors
Biotin	Vitamin B-7; a coenzyme involved in the synthesis of fatty acids and the catabolism of amino acids; plays a role in gluconeogenesis
Brewer's dried yeast	High-quality protein source rich in amino acids
Brewer's rice	Whole and broken grains of rice, a digestible grain, acts as a high-quality carbohydrate source providing energy

By-product	Poultry by-products may include heads, feet, and viscera, but may not include feathers or feces. Meat by-products may include organs, blood and bone, but may not include hair, horns, hooves, teeth or feces
Calcium carbonate	Source of calcium; supports strong teeth and bones
Calcium gluconate	The calcium salt of gluconic acid; source of calcium. Supports strong bones and teeth
Calcium iodate	Source of calcium, to support strong bones and teeth, and iodine, to promote proper thyroid function
Calcium pantothenate	Source of vitamin B-5 (pantothenic acid), which helps metabolize and utilize carbohydrate, protein, and fat for energy
Calcium phosphate	Source of the essential minerals, calcium and phosphorus, which function in skeletal formation, muscle contractions, nerve impulse transmission and blood coagulation
Calcium sulfate	Source of calcium to support strong bones and teeth
Canola meal	High-quality protein source rich in amino acids, vitamins and essential minerals
Canola oil	Energy-packed oil containing both omega-6 and omega-3 fatty acids
Caramel color	Provides a rich color to the food
Carrageenan	Seaweed extract used to thicken or modify the texture of foods
Cassava root flour	High-quality source of carbohydrate that provides energy
Cellulose	Derived from fiber-rich plants. An insoluble fiber that contributes to fecal bulk and improves stool quality. It also helps minimize the formation of hairballs
Chicken	The clean flesh and skin, with or without bone, derived from the parts of whole carcasses of poultry. A source of protein and essential amino acids
Chicken meal	The dry, rendered form of ground chicken, and an excellent source of protein and essential minerals
Choline chloride	Source of choline; essential in supporting your pet's proper liver function and metabolism

Coconut oil	Oil extracted from the kernel of mature coconuts. Provides medium-chain triglycerides to the diet; a highly digestible source of energy
Colostrum	Source of proteins (immunoglobulins) and many other nutrients derived from milk to help support immune and GI health
Copper proteinate	Source of copper; aids in hemoglobin synthesis and skeletal production
Copper sulfate	Source of copper; aids in hemoglobin synthesis and skeletal production
Corn germ meal	Corn germ meal is what remains after removing the oil from corn kernels, then grinding them to create a nutrient-rich ingredient. It provides a rich source of fiber for healthy digestion, as well as a high-quality protein source for strong muscles
Corn gluten meal	Corn gluten meal is created by removing starch, bran, and germ from the corn kernel. Serves as a high-quality source of protein
Corn, ground	The entire corn kernel ground or chopped. A source of energy, amino acids, linoleic acid, and vitamins and minerals
Corn oil	Oil extracted from corn germ. A source of unsaturated omega-6 fatty acids, including the essential fatty acid linoleic acid, that helps support healthy skin and a shiny coat
Corn starch	Starch obtained from corn; used as a thickening agent. In hydrolyzed diets, a carbohydrate source that contains extremely low amounts of protein
Dextrose	Sugar
DL-methionine	Sulfur containing essential amino acid required for the formation of other compounds and structures in the body
Dried beet pulp	Dried beet pulp is what remains after removing the sugar of the beet so the fiber-rich portion of the vegetable remains. Utilized as a fiber source to improve stool quality
Dried egg product	Excellent source of protein and essential amino acids. Also contains glucosamine and fatty acids
Dried whey	Product obtained by removing water from whey. A high-quality source of protein

Dried yeast	Dried yeast is non-fermentative and made up of at least 40% protein. A flavor enhancer and high-quality source of protein and B vitamins
<i>Enterococcus faecium</i>	Bacterium found in the gut of many animals, including dogs and humans. Used in probiotics, can be helpful in nutritionally managing dogs/cats with stress diarrhea and other GI conditions
Ferrous sulfate	Source of iron, which is a major component of the oxygen-carrying protein hemoglobin in the blood
Fish meal	Fish meal is made up of fish that has been ground and cooked, reducing the fat content. A source of protein that is rich in omega-3 fatty acids
Fish oil	Oil obtained from the tissues of oily fish, like menhaden. Rich in EPA, an omega-3 fatty acid, it promotes healthy joints, and skin and coat health. It also supports a healthy immune system. Plus, the DHA from fish oil contributes to healthy vision and brain development in puppies and kittens
Folic acid	Vitamin B-9; a form of folate which is necessary for amino acid metabolism and cell membrane integrity
Garlic oil/powder	Palatability enhancer
Glycerin	Used as a softening agent to make the texture of wet/dry kibble soft or chewy
Ground wheat	Source of energy, amino acids, linoleic acid, vitamins and minerals
Guar gum	Natural, highly soluble carbohydrate source used as a thickener and stabilizer
Gum Arabic	Hardened sap of various species of the acacia tree or other botanical sources. It is used in pet food to provide texture
Hydrolyzed chicken or chicken liver	Chicken or chicken liver that has been enzymatically digested to produce smaller peptides; nutrition is maintained but body does not recognize the protein as an allergen
Hydrolyzed salmon	Salmon that has been enzymatically digested to produce smaller peptides; nutrition is maintained but body does not recognize the protein as an allergen
Hydrolyzed soy protein isolate	Product resulting from hydrolysis of dehulled soybeans after the non-protein components have been removed. High-quality protein source

Inulin	Polysaccharide product obtained from plant sources such as chicory, agave, and Jerusalem artichoke by hot water extraction. It is intended as a source of soluble, fermentable fiber
L-ascorbyl-2-polyphosphate	Source of vitamin C
L-carnitine	Amino acid complex that helps convert fat into energy more efficiently, promoting a healthy weight in your pet
Lecithin	Mixture of phospholipids – a major source is soybean oil; enriches fat and protein and helps to improve pelletization
Liver	Source of protein, vitamins and minerals
Liver flavor	Highly palatable, natural flavoring sourced from pork and poultry
L-lysine monohydrochloride	Source of lysine, an essential amino acid which aids in protein synthesis
Locust bean gum	Vegetable gum extracted from the seeds of the carob tree. Used as a thickening agent
Long grain rice	Whole and broken grains of rice that give pets a source of carbohydrate that provides energy
Magnesium	Important for cell energy production. It influences calcium levels inside cells, helps transport sodium and potassium across cell membranes, and aids bone growth. It also helps transmit electrical impulses across nerves and muscles, which generates a neuromuscular contraction causing muscles to flex
Magnesium oxide	Source of magnesium essential for overall body health including heart health, muscle contraction and strong bones
Magnesium sulfate	Source of magnesium essential for overall body health including heart health, muscle contraction and strong bones
Malted barley flour	Form of barley which has undergone the malting process (germination)
Maltodextrins	Carbohydrates derived from the partial hydrolysis of starch
Manganese	Manganese is a micromineral and functions as a component of several cell enzymes that catalyze metabolic reactions. Manganese is necessary for normal bone development, joint health and reproduction

Manganese proteinate	Source of the mineral manganese, which is essential in overall nutrient metabolism, nervous system function and normal bone development, joint health, and reproduction
Manganese sulfate	Source of the mineral manganese, which is essential in overall nutrient metabolism, nervous system function and normal bone development, joint health, and reproduction
Meat by-products	Non-rendered clean parts, other than meat, derived from mammals. It can include lungs, spleen, kidneys, livers, and blood. It does not include hair, horns, hooves, teeth, or feces
Medium-chain triglyceride vegetable oil	Medium-chain triglycerides (MCTs) are brain-supporting nutrients sourced from palm and coconut oils. They are the product of vegetable origin obtained by extracting the oil from seeds or fruits which are commonly processed for edible purposes. They consist predominantly of glyceride esters of fatty acids and contain no additions of free fatty acids
Menadione sodium bisulfite complex	Source of vitamin K activity for pet food and treats
Methionine	See DL-methionine
Mixed-tocopherols	Tocopherols are a mixture of vitamin E isomers. They provide a potent preservative, which also supplies a small amount of the benefits of dietary vitamin E
Mono and dicalcium phosphate	Mono and dicalcium phosphate is a source of calcium and phosphorus – essential minerals that help strengthen teeth and bones
Natural and artificial flavors	Proprietary flavor blend for enhanced palatability
Natural smoke flavor	Natural liquid smoke flavor added to impart taste and aroma
Niacin supplement	Niacin is an essential B vitamin that can be found naturally in ingredients like meat, poultry and fish. It is essential in helping properly metabolize carbohydrates, protein and fat
Oat fiber/Oat hulls	Oat fiber is a more concentrated source of dietary fiber than oat bran
Oat meal	Oat meal is made of rolled oats. It's a natural source of carbohydrates that helps provide fuel for a healthy energy level. It is also a nutrient-dense source of fiber for healthy digestion and a source of protein for strong muscles

Ocean whitefish	Contains fish such as cod, pollock, haddock, sole and halibut and is an excellent source of protein
Omega-3 fatty acids	Family of fatty acids found in fat sources such as flaxseed and fish oil. Flaxseed is a good source of alpha-linolenic acid (18:3n-3), while fish oils are a good source of eicosapentaenoic acid (EPA, 20:5n-3) and docosahexaenoic acid (DHA, 22:6n-3)
Omega-6 fatty acids	Family of fatty acids found in fat sources such as chicken fat and vegetable oils. Linoleic acid (18:2n-6) is an essential fatty acid for dogs and cats that is important to help maintain a healthy skin and coat
Pea fiber	Pea fiber is derived from cleaned and processed pea hulls. Pea fiber is a good source of both insoluble and soluble fiber that helps support normal bowel health
Pea protein	High-quality protein source rich in amino acids
Pearled barley	Pearled barley is what remains after removing the hull and bran layer of the barley but leaves the endosperm and germ intact
Phosphoric acid	Promotes an optimal pH in the product
Phosphorus	Phosphorus is a macromineral found mostly in bones and teeth. Phosphorus is part of every cell. It is important in genetic material, is a part of phospholipids and is used in energy transfer and in buffer systems that maintain acid-base balance
Potassium carbonate	Source of potassium, a mineral that is essential for the correct functioning of cells in the body and helps maintain the acid-base balance in the body
Potassium chloride	Source of potassium, a mineral that is essential for the correct functioning of cells in the body and helps maintain the acid-base balance in the body
Potassium citrate	Potassium salt of citric acid
Potassium iodide	Source of the essential nutrient iodine. Potassium helps maintain fluid balance in the body and helps nerve and muscle function. Iodine is an essential component of thyroid hormone
Potassium sorbate	Used as a mold inhibitor in pet food
Potato protein	Potato protein is the concentrated, protein-rich part of the potato that helps strengthen and maintain muscles

Poultry by-product	Consists of the non-rendered, clean parts of carcasses of slaughtered poultry, such as necks, feet, and viscera. It provides essential amino acids, fats, vitamins and minerals as well as palatability to the food. It excludes feces and feathers
Poultry by-product meal	Made of chicken and/or turkey that have been ground and cooked, reducing the fat content to create a protein-rich ingredient
Poultry hearts	Protein source from chicken or turkey containing essential amino acids
Poultry livers	Source of protein, vitamins and minerals
Powdered cellulose	Source of insoluble fiber
Psyllium	Mixed fiber source containing both soluble and insoluble properties
Pumpkin	A gourd rich in fiber, potassium and vitamin C
Pyridoxine hydrochloride	Source of the B vitamin pyridoxine, also known as vitamin B-6, which is necessary for overall metabolism and amino acid synthesis in the body
Red 3	Food color recognized as safe by the FDA for use in both human foods and pet foods
Riboflavin supplement	Riboflavin (vitamin B-2) is a water-soluble vitamin. Vitamin B-2 is essential for the normal release of energy from carbohydrate, protein and fat in food. It is important for normal growth and development, the production of and regulation of certain hormones, and eye pigment formation
Rice	Rice is a natural source of carbohydrate that helps make food more digestible. It also has the added benefit of being a high-quality source of energy
Rice bran	The combination of aleurone and pericarp of rice. Rice bran provides many different nutrients, including dietary fiber and essential fatty acids
Rice flour	Finely ground meal from the milling of rice, which consists primarily of the starch and gluten fractions. Rice flour provides an excellent source of highly digestible carbohydrate for energy
Rice starch	Concentrated carbohydrate source with minimal protein content

Salmon	Salmon is a marine and freshwater fish high in protein and long-chain omega-3 fatty acids
Salmon meal	Salmon meal is made up of salmon that has been ground and cooked, reducing the fat content to create a protein-rich ingredient. Also rich in omega-3 fatty acids
Salt	Source of the essential nutrients sodium and chloride, helps regulate proper blood pH levels, water balance, kidney function, and enhances palatability
Selenium	Essential trace mineral. It is a major antioxidant and works with vitamin E to maintain cell membranes. Selenium also helps preserve tissue elasticity
Sodium	Sodium is the principle positively charged ion in the extracellular fluids of the body. It is an electrolyte that is critical to the maintenance of fluid balance, nerve transmissions and muscle contractions
Sodium ascorbate	Sodium ascorbate is a non-acidic form of vitamin C
Sodium bicarbonate	Alkalinizing agent; helps with processing
Sodium bisulfate	Helps to lower urine pH
Sodium caseinate	Protein source produced when milk is curdled
Sodium phosphate	Source of sodium and phosphorus
Sodium selenite	Source of the mineral selenium, which functions as an antioxidant and works with vitamin E to maintain cell membranes
Sorbic acid	White crystalline carboxylic acid used as a preservative
Soybean germ meal	Soybean germ meal is made by removing the oil in the beans, then grinding them. It is a high-quality source of protein, and helps to aid in maintaining a healthy weight
Soybean hulls	The outer covering of the soybean. They serve as a source of fiber to aid in digestion, gut motility, and satiation
Soybean meal	Comes from finely ground soybeans, after their oil has been removed. This ingredient is an excellent source of protein
Soybean oil	Oil that has been pressed from soybeans. Soybean oil provides a source of both omega-3 and omega-6 fatty acids to support many health systems including skin and coat

Soy flakes	High protein source, low in fiber and fat
Soy flour	Finely ground soybeans after their oil has been removed. Source of protein
Soy protein concentrate	A concentrated protein source made from soy. Protein is an essential nutrient that helps promote strong muscles, provides energy and helps support a healthy immune system
Soy protein isolate	Soy protein isolate is at least 90% protein, created by removing the non-protein parts of the soybean. As a high-quality source of protein, it helps strengthen and maintain muscles
Tapioca starch	Starch extracted from the roots of the cassava plant used as an alternative source of carbohydrate. Contains extremely low amounts of protein
Taurine	Taurine is an essential amino acid for cats because they cannot synthesize taurine on their own; they lack the proper liver enzymes. Without sufficient levels, cats may develop eye and heart issues. It also contributes to a cat's and dog's heart health
TBHQ	Tertiary butyl hydroquinone; a preservative used in pet foods also approved by the FDA for use in human foods
Thiamine mononitrate	Thiamine (vitamin B-1) is a water-soluble vitamin also known as thiamin or thiamine hydrochloride. It is required for normal functioning of all body cells, especially nerves, and peristaltic movement in the GI tract. Vitamin B-1 is involved in numerous body processes that convert food into energy and support heart muscle
Tricalcium phosphate	Source of calcium and phosphorus-essential minerals that help strengthen your pet's teeth and bones
Trout	Trout is a freshwater fish that is naturally sourced from rivers and lakes. It's a high-quality source of protein and amino acids
Turkey	Turkey is the clean combination of flesh and skin with or without accompanying bone, derived from the parts or whole carcasses of turkey or a combination thereof — exclusive of feathers, heads, feet, and entrails
Vegetable oil	The product of vegetable origin obtained by extracting the oil from seeds or fruits. Can include corn oil, soybean oil, coconut oil, etc.

Vitamin A acetate	Vitamin A is a family of compounds that may also be referred to as retinol, retinal, retinyl, or retinoic acid. Vitamin A also helps develop and maintain the cornea in the eye, all mucous membranes, the digestive tract, the urinary tract, the reproductive tract, the skin and the lungs. It is important for normal body growth and the formation of bones and soft tissue. This vitamin also helps support the immune system
Vitamin A supplement	Fat-soluble vitamin which supports normal vision, a healthy immune system, bone and muscle growth, maintenance of healthy skin and hair coat, reproduction, etc.
Vitamin B-12 supplement	Vitamin B-12 (also known as cobalamin or cyanocobalamin) is the largest, most complex, and most potent water-soluble compound essential to animals. It is essential in blood formation and carbohydrate metabolism
Vitamin D-3 supplement	Vitamin D-3 is a fat-soluble vitamin also known as cholecalciferol. It is the major active substance in vitamin D. Its main function is to stimulate the absorption of calcium and phosphorus, aiding in the formation of normal bones and teeth. It also helps to maintain a healthy nerve and muscle system by regulating the level of calcium in the blood
Vitamin E supplement	Fat-soluble vitamin and antioxidant that protects fat and vitamin A from destruction by free radicals
Wheat bran	The coarse outer covering of the wheat kernel as separated from wheat in commercial milling. A high-quality fiber source
Wheat flour	Finely ground meal from the milling of wheat. Consists primarily of the starch and gluten fractions. These provide an excellent source of highly-digestible carbohydrate for energy
Wheat gluten	Protein and carbohydrate source that is made from removing most of the starch from the grain
Whey protein	Portion that remains after whole cow's milk is fermented into cheese (curds and whey). This nutritious source of protein is considered to have an ideal amino acid content and balance, making it a highly valued protein source
Whole grain corn	Dried corn kernels used as a natural source of carbohydrates that help fuel your pet's body for healthy energy. Also contains linoleic acid, an omega-6 fatty acid for healthy skin and a shiny coat, and is a source of protein for strong muscles
Xanthan gum	Carbohydrate used as a thickening agent

Yellow 5

Food color recognized as safe by the FDA for use in both human foods and pet foods

Zinc

Mineral that aids in the metabolism of carbohydrate, fat and protein, and helps support a healthy immune system

Zinc proteinate

Source of zinc resulting from the chelation of a soluble salt with amino acids and/or partially hydrolyzed protein

Zinc sulfate

Source of zinc that is important in overall nutrient metabolism, skin barrier and immune system
